

Options and Accessories

Adiabatic cooling

Options and Accessories

Below is a listing of the main TRF options and accessories. If your required option or accessory is not listed, look no further than your [local BAC representative](#).

Increase the coil's resistance against a harsh atmosphere.

Ease of access

Increase ease of access to the sump and pumps in case of recirculation to facilitate maintenance.

Allow for operation without any anti-freeze agents and avoid a coil freeze-up risk at the same time.

Reducing noise at air **intake and discharge points** brings us closed to silent cooling equipment.

Increase the degree of redundancy, providing a higher backup capacity for your installation.

The recirculation pump helps to further cut down on water consumption.

Flanges facilitate **pipng connections** on-site.

This option integrates the adiabatic cooler's control system in your BMS system.

Cuts power to motor with **safety in mind** during inspection or maintenance.

Motor removal davit

For **easy removal or lifting** of the side motor.

Ladder

A ladder to **facilitate access to the top of the unit** and safe inspection of your cooler.
